

## § 3510.20

(c) The acreage of the modified lease, including additional lands, is not in excess of the maximum size allowed for a lease, as specified in § 3503.37 of this part;

(d) The mineral deposit is not in an area of competitive interest to holders of other active mining units in the area;

(e) The lands for which you applied for a fringe acreage lease lack sufficient reserves of the mineral resource to warrant independent development;

(f)(1) The lands for which you applied for a lease modification contain known deposits of the same mineral deposit that can be mined only as part of the mining operations on the original Federal lease; or

(2)(i) The acreage to be added does not contain known deposits of the same mineral; and

(ii) The acreage to be added will be used for surface activities that are necessary for the recovery of the mineral deposit on the original Federal lease; and

(iii) Had the acreage added by the modification been included in the original Federal lease at the time of that lease's issuance, the original Federal lease would have been reasonably compact.

(g) Leasing the lands will conserve natural resources and will provide for economical and efficient recovery as part of a mining unit; and

(h) You meet the qualification requirements for holding a lease described in subpart 3502 of this chapter and the new or modified lease will not cause you to exceed the acreage limitations described in § 3503.37.

[64 FR 53536, Oct. 1, 1999, as amended at 74 FR 641, Jan. 7, 2009]

### **§ 3510.20 Do I have to pay a fee to modify my existing lease or obtain a fringe acreage lease?**

Yes. Before BLM issues a new fringe acreage lease or modifies your existing lease, you must pay a bonus in an amount we will determine based on an appraisal or other appropriate means. The bonus cannot be less than \$1 per acre or fraction of an acre.

## 43 CFR Ch. II (10–1–14 Edition)

### **§ 3510.21 What terms and conditions apply to fringe acreage leases and lease modifications?**

Your fringe acreage lease is a new Federal lease. Therefore, we may impose terms and conditions different from those in your original Federal lease. A modified lease will be subject to the same terms and conditions as in the original Federal lease.

## **Subpart 3511—Lease Terms and Conditions**

### **§ 3511.10 Do certain leases allow me to mine other commodities as well?**

Yes. Sodium leases authorize you to mine potassium compounds as related products, and potassium leases authorize mining associated sodium compounds and related products. A phosphate lease allows you to use deposits of silica, limestone or other rock on the lease for use in the processing or refining of phosphate, phosphate rock, and associated minerals mined from the leased lands. You must pay royalty on these materials as specified in your lease.

### **§ 3511.11 If I am mining calcium chloride, may I obtain a noncompetitive mineral lease to produce the commingled sodium chloride?**

Yes. If you are producing calcium chloride in paying quantities from an existing mine which you control, you may apply to BLM for a noncompetitive lease to produce the commingled sodium chloride. You must already have authorization, under part 3800 of this chapter, for the locatable minerals. You must also meet the other requirements of this part for the commingled leasable minerals.

### **§ 3511.12 Are there standard terms and conditions which apply to all leases?**

Yes. BLM will issue your lease on a standard form which will contain several terms and conditions. We will add your rental rate, royalty obligations and any special stipulations to this lease form.
